

Are You Frustrated With Acne & Wish You Had Clear, Healthy Skin?

You're not alone. In fact, over 60 million Americans suffer from acne¹ and unfortunately, many have had difficulty finding a treatment that works.

You may have tried manual exfoliants, harsh chemical peels, over-the-counter cleansers or oral medications for persistent acne, and you are still frustrated with breakouts.

Now There's a Breakthrough, Painless Acne Laser Treatment Called Isōlaz™

Recently, the FDA cleared a new treatment for acne called Isōlaz Acne Deep Pore Laser Therapy.

Rated among the 3 hottest products at the 2007 American Academy of Dermatology conference, Isōlaz™ uses a breakthrough technology called Photopneumatics™ to purify your pores from the inside out.

No matter your age or skin type, Isōlaz™ deep pore purification is a revolutionary way to help you have a radiant, clear complexion.

Painless, Breakthrough Laser Therapy
For Dramatically Clearer Skin

Purifying skin from
the inside out.

Purify your pores from the inside.

Why Isōlaz™ Acne Therapy?

- Isōlaz™ clinical studies show immediate results within 24-48 hours, including reduced redness and immediate drying/flattening of the blemish
- People who have tried Isōlaz™ have reported a visible reduction in pore size, improved skin tone and texture for a younger, healthier looking complexion
- Isōlaz™ deep pore-purification™ therapy helps jump-start acne treatments by helping your skin absorb topical medicines and moisturizers better
- Isōlaz™ can help remove red, brown spots and tiny broken capillaries sometimes associated with rosacea

Only Therapy That Combines Vacuum With A Painless Laser To Deep Purify Your Pores

Isōlaz™ is the world's only aesthetic technology that combines vacuum with a **painless** laser

- **Vacuum:** Helps loosen & extract dirt, blackheads & excess oil from deep within your pores
- **Painless Laser:** Helps destroy acne-causing bacteria, uneven skin tone, sun damaged skin, facial redness, veins and unwanted hair

During Your Isōlaz™ Treatment

Before: Your skin will be hydrated with a soothing mist before applying the Isōlaz™ tip. Since the treatment is painless you won't need pre-numbing!

During: When the Isōlaz™ tip is placed on your skin, you will feel a painless, warm sensation. The process is repeated over the entire treatment area. In a recent clinical study, 100% of patients reported no pain during treatment. Treatment sensation was most commonly described as being similar to that of a warm massage.

After: There are no post-treatment regimes associated with Isōlaz™ therapy. Once your treatment is complete, you are free to resume your normal activities and you can apply make up immediately. In fact, you may find that your skin takes on a healthy glow and feels cleaner right away.

Acne Therapy

How Isōlaz™ Works

Isōlaz™ controls acne at the source by providing a unique combination of vacuum and a painless laser that helps clear existing acne while helping prevent future breakouts.

Place

During an Isōlaz™ treatment the hand-piece is placed on the skin

Activate

A vacuum gently lifts the acne impurities closer to the skin's surface. You may even find your pores cleansed of blackheads and whiteheads as your pores are purified.

Treat

In a fraction of a second, a painless laser helps destroy the acne, sloughing the oils and dead skin cells away. The sebaceous glands may shrink reducing the production of oils.

Clear

Your skin is left healthier, clearer, and cleaner. Pores may also reduce in size and many patients have found their skin feels tighter and has a healthy radiant glow.

Isōlaz™ Also Purifies Your Pores

The Isōlaz™ vacuum applies gentle pressure on your pores while the painless laser helps destroy the acne causing bacteria. This helps soften and remove blackheads, dead cells and other debris from deep in your pores resulting in radiant, clear skin that is purified from the inside out.

Isōlaz™ Helps Remove Blackheads, Oils, and Debris
